

On behalf of the American Cancer Society, the American Diabetes Association, and the American Heart Association, we are pleased to provide you with the following materials regarding physical education and health education in schools:

- A joint statement and fact sheet on physical education.
- ➤ A joint statement and fact sheet on health education.

These documents were developed through an on-going collaboration between our three organizations on issues related to the prevention of cancer, diabetes, heart disease, and stroke.

Please feel free to use this information in support of your organization's efforts to improve the health of our nation's schoolchildren. We invite you to contact us when specific opportunities arise in which our organizations may be helpful in furthering the cause of health education and physical education in schools.

Thanks,

John R. Seffrin, PhD Chief Executive Officer
